URL Disabler Crack

URL Disabler is an application designed to help users prevent the risks of malware and spyware infections. The software acts as a VPN to the Internet when you are trying to access a website with content that you would not want to be seen by the public. The program is made to work with most of the major browsers including Chrome, Firefox and Edge Chromium. It can be used to block all URL's at once, as well as individual website pages. It can be used on a single computer, a network, or a mobile device. It is completely free and does not require installation, so you don't have to worry about updating or removing it from your system. It is also very easy to use and install. URL Disabler is a free web browser extension that helps you prevent the risks of malware and spyware infections by blocking inappropriate content on the Internet. It works by turning your Internet browser into a virtual private network (VPN) that allows you to access your blocked sites from any place, any time. It's free, simple to use and there are no limits on how many websites or domains you can block. Features: - Prevents you from accessing websites with mature content - Includes a built-in history that makes reversing very easy. - Includes an easy-to-use Options menu. - Works with three of the most popular browsers, including Chrome, Edge and Firefox. - Works on a single computer or on a local network. - Does not require installation. - Works on any operating system, including iOS, Android, Windows, Mac OS X and Linux. - No ads, pop-ups or other types of annoying advertisements. - Great for schools, workplace environments and privacy. - Does not collect or share any data. Website Blocking: - Blocks specific websites or sets of websites. - No need to log in, sign up or create an account. URL Disabler does not permanently remove the blocked website from your browser. If you decide to change your mind, the blocked site will simply reappear in a few days. Parental Control: - Allows you to set "minutes" or "hours" for time-based restrictions. - Restricts websites based on
